

Visure, the Requirements Company, announces Value-Added Reseller partnership with Real-Time Software Solutions Inc. in North America

Real-Time Software Solutions Inc. has been appointed Visure's Representative in North America for its Requirements Definition and Management tool IRQA.

Madrid/Montreal – February 2008. Visure Solutions announces a new partnership with Real-Time Software Solutions Inc., in response to an increased demand for best-in-class Requirements Definition & Management tools.

By adding IRQA to its portfolio of solutions, Real-Time Software Solutions Inc. will be able to deliver tools and services to its existing customers wishing to further improve on their business and development processes.

New customers to Requirements Definition and Management in the region have now a trusted advisor that is committed to their success. Real-Time Software Solutions Inc. will not only provide a best-in-class tool, but will also offer related services to maximize customer investment.

IRQA supports process improvement by allowing the implementation of different market standards as CMMI, SPICE, ISO, ad hoc.

IRQA belongs to a new generation of Requirements Definition and Management tools: the emphasis is not only on requirements management but also on requirements analysis, project organization and support to high-level functionalities.

Visure Solutions, developer of IRQA is a leading company in the field of Requirements Definition & Management, providing state-of-the-art tools and high level services.

Evaluation:
